BYD HAN

INTRODUCTION

What is BYD?

Build Your Dreams — born in Shenzhen, 1995

01 THE NAME

BYD stands for **Build Your Dreams**.

02 THE BIRTHPLACE

Born in **Shenzhen**, in the year **1995**.

03 THE FIRST BUSINESS

Started with **rechargeable batteries** — the power behind early mobile technology.

Battery cells — where the dream began

HISTORY

From Battery Maker to Car Giant

Three milestones across thirty years

1995

Founded in Shenzhen

Started with rechargeable batteries

8 years of batteries

2003

Entered auto industry

A bold move into car manufacturing

20+ years of growth

Today

China's largest car company

From battery maker to global giant

One company, three decades — from storing energy to driving the world.

ACHIEVEMENTS

Recognized Around the World

Three accolades that back up the story

BATTERY

World's 2nd-largest producer of rechargeable batteries

While other car companies buy batteries from suppliers, BYD builds its own.

GLOBAL AWARD

Recipient of the UN-Energy Special Award

Recognized for its contribution to sustainable development worldwide.

NATIONAL RANKING

Listed in the Top 500 Chinese Enterprises

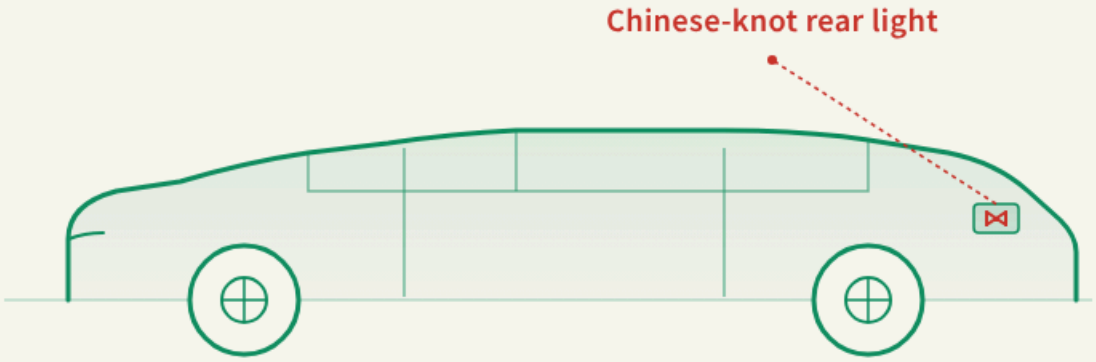

A place among China's most influential and largest companies.

Vertical integration — BYD designs and builds its own batteries, giving it control over cost, supply and innovation.

PRODUCT HIGHLIGHT

The BYD Han

Stylish • Powerful • Smart

Illustrative silhouette — not a product photograph

Stylish

Futuristic aerodynamics blended with traditional Chinese aesthetics; rear lights feature the **Chinese knot** design.

Performance

Breathtaking acceleration that challenges luxury sports cars costing twice as much.

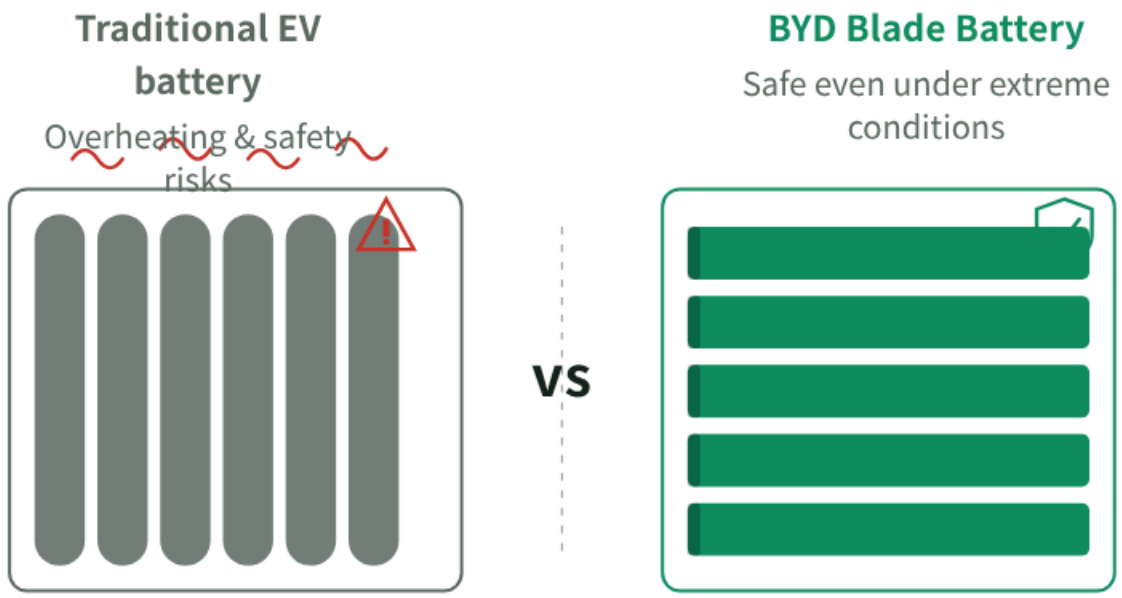

Technology

Smart interior, advanced safety, and the revolutionary **Blade Battery**.

KEY TECHNOLOGY

The Blade Battery

Safety reimagined for electric vehicles

Concept diagram — not an engineering drawing

THE OLD PROBLEM

Traditional electric vehicle batteries had issues with **overheating and safety** — one of the biggest concerns consumers have about electric vehicles.

THE BLADE ANSWER

A revolutionary innovation by BYD: the Blade Battery is designed to be **incredibly safe, even under extreme conditions**.

WHY IT MATTERS

This technology is what makes the Han not just a car, but a **smart mobile terminal**.

SIGNIFICANCE · 01

Leading New Energy Technology

When BYD innovates, the whole industry moves forward

01

INNOVATION

Innovation is the lifeblood of progress.

Pushes boundaries	Batteries, motors and electronic controls — always one step ahead.
Sets the standard	What BYD builds today becomes the benchmark the rest of the world follows.
Accelerates the shift	Forcing other manufacturers to catch up, and speeding the global move away from fossil fuels.

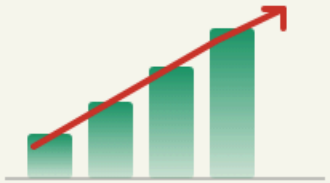

→ Next: how BYD drives economic growth across China.

SIGNIFICANCE · 02

Driving Economic Growth

A powerhouse engine for our economy

02

A Top 500 enterprise that **provides thousands of jobs** and supports a vast supply chain of parts manufacturers.

As BYD expands globally — selling cars in Europe, Japan and the Americas — it brings economic value back to China.

- **Thousands of jobs**
- **Vast parts supply chain**
- **Value back to China**

GLOBAL MARKETS

Europe	Japan	Americas
Selling cars	Selling cars	Selling cars

SIGNIFICANCE · 03

Enhancing National Pride

From the world's factory to the world's innovator

For a long time, the global automotive industry was dominated by foreign brands — when we thought of luxury or performance, we thought of German, Japanese or American cars.

BYD has changed that narrative.

DESIGN Chinese knot design meets world-leading technology.

IDENTITY A BYD car on streets around the world fills us with pride.

BEFORE

The world's factory

→

NOW

The world's innovator

SIGNIFICANCE · 04

Protecting the Environment

Cool the Earth by 1 degree

04

Climate change is the biggest crisis facing my generation.

Carbon emissions from traditional gasoline cars are a major contributor to global warming. BYD is directly attacking this problem — every electric car on the road means less smoke in the air, less carbon in the atmosphere, and a cleaner future.

- → Less smoke in the air
- → Less carbon in the atmosphere
- → A cleaner future

BYD MISSION | **Cool the Earth by 1 degree**

VOCABULARY

Three Key Terms

Words to remember from today's talk

01

Blade Battery

BYD's revolutionary innovation

A revolutionary battery from BYD that stays incredibly safe even under extreme conditions.

02

Carbon Emissions

The problem we fight

The carbon released by gasoline cars — a major cause of global warming.

03

Rechargeable Batteries

BYD's 1995 starting point

Batteries that can be charged again and again — the heart of every electric vehicle.

Keep these three words in mind — they are the thread that runs through today's story.

CONCLUSION

From Battery Maker to Global Car Giant

Build Your Dreams — and cool the Earth

We do not have to compromise between **economic growth** and **environmental protection**.

We can have **both**.

1995	A battery maker in Shenzhen
2003	Dares to build cars
Today	China's largest car company · world leader in green tech

THE MISSION

Build Your Dreams

— an invitation to dream of a cooler Earth.
