BYD HAN

INTRODUCTION

What is BYD?

Build Your Dreams

Three simple letters. One big dream.

1995	Born in Shenzhen, China
BATTERY	Started with rechargeable batteries
CAR	Then moved into automobiles

COMPANY PROFILE & HISTORY

From Battery Maker to Car Giant

A timeline of bold decisions

1995

Founded in Shenzhen

A battery maker

2003

Entered car making

A bold, risky move

Today

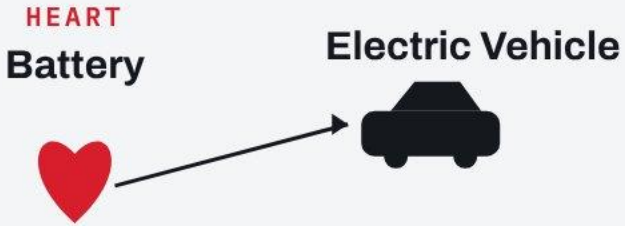

China's largest NEV company

From battery to car giant

THE THREAD Mastering batteries first made the leap into cars possible.

The Heart of the Car

BYD builds its own batteries

BYD

Builds its own battery

Quality • Safety • Cost

Other car companies

Buy from suppliers

Less control

Why it matters

01 Battery is the heart of an electric vehicle

02 BYD masters battery technology

03 Vertical integration → quality, safety, cost

MAJOR ACHIEVEMENTS

Proven on the World Stage

Recognized globally, not just claimed

#2

World's 2nd-largest EV battery producer

17% global share · 2024

UN-Energy Special Award

2015

Fortune Global 500 company

91st · 2026

WHY IT MATTERS

BYD builds its own batteries — the most critical technology inside its vehicles.

That vertical integration gives an edge in quality, safety, and cost.

01 Stylish
A piece of art

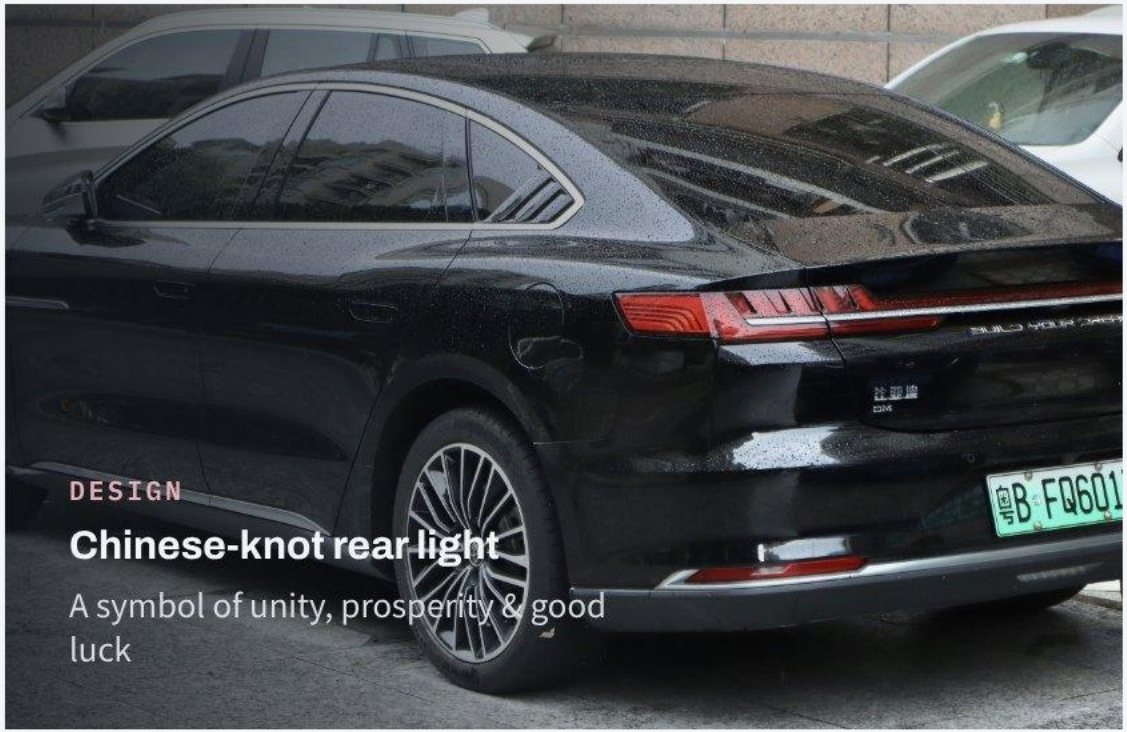

02 Excellent performance
Challenges luxury sports cars

03 Advanced technology
Smart interior • safety • Blade Battery

PRODUCT HIGHLIGHT

Design & Technology

Tradition meets cutting-edge tech

DESIGN

Chinese-knot rear light

A symbol of unity, prosperity & good luck

PERFORMANCE

3.9 s
0–100 km/h

Flagship AWD Han EV • 363 kW / 487 hp

BLADE BATTERY

- **Nail penetration test** — no fire, no smoke, surface 30–60 °C
- **>5,000 cycles** — long service life
- **>50% space utilisation** — LFP chemistry

Leading Technology & Driving Growth

01 TECHNOLOGY

Leads new-energy vehicle technology

Innovation is the lifeblood of progress.

- Pushes the boundaries of batteries, motors & electronic controls
- Sets the standard — forcing other manufacturers to catch up
- Accelerates the global shift away from fossil fuels

02 ECONOMY

Drives economic growth

A Top 500 enterprise powering the economy.

- Provides thousands of jobs
- Supports a vast supply chain of parts manufacturers
- Expanding globally — Europe, Japan & the Americas

National Pride & a Cooler Earth

03 PRIDE

Enhances national pride

Chinese engineering & design are world-class.

- For decades, the global car industry was led by foreign brands
- BYD changed that narrative — a Chinese car on streets worldwide
- No longer just the world's factory — now the world's innovators

04 ENVIRONMENT

Protects the environment

Cool the Earth by 1 degree

- Climate change is the biggest crisis of our generation
- Every EV means less smoke & less carbon in the air
- Not just selling cars — selling a cleaner future

VOCABULARY & TERMS

Key Terms, Simply Explained

01	**Blade Battery**	A super-safe battery that doesn't overheat.
02	**Carbon emissions**	The gases that warm the planet.
03	**Rechargeable batteries**	Batteries you can charge again and again.
04	**Vertical integration**	A company builds its own parts.
05	**New-energy vehicle**	A car powered by clean energy.

> These five words will help you follow the story of BYD — from a battery workshop to a green-tech giant.

From a battery maker to a global car giant helping the environment

We don’ t have to choose between economic growth and a greener planet.

Build Your Dreams.

Cool the Earth by 1 degree

An invitation to dream of a cleaner sky and a cooler earth.

THANK YOU

Thank You For Watching
