BUILD YOUR DREAMS

BYD AUTO

Cool the Earth by 1 degree

Presented by Dong · Class 4, Grade 7

INTRODUCTION

Build Your Dreams

A battery maker born in Shenzhen, 1995

B·Y·D STANDS FOR

Build
Your
Dreams

FOUNDED

1995 · Shenzhen

FIRST PRODUCT

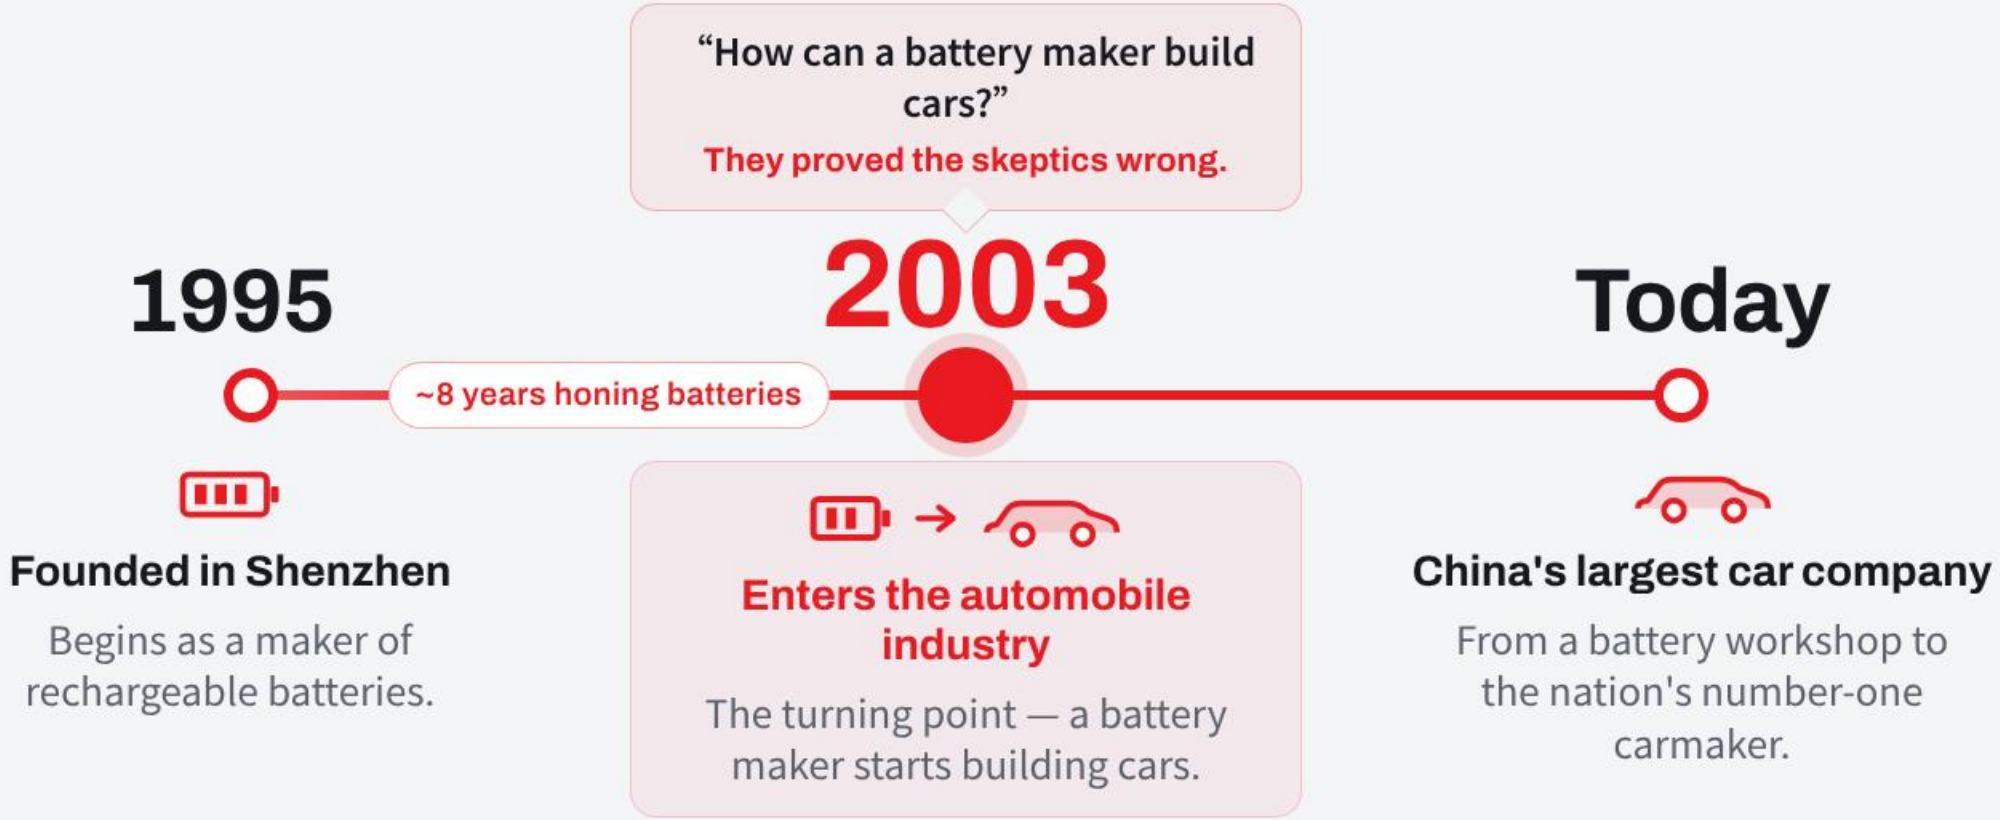

Rechargeable batteries

The unsung heroes that powered our first mobile phones and laptops. Cars came later — the battery was always the heart.

COMPANY HISTORY

From batteries to China's largest carmaker

Three decades, one bold bet

MAJOR ACHIEVEMENTS

Recognized around the world

Three milestones that prove the rise

01

No.2

World's second-largest rechargeable battery producer

It builds the most critical technology inside its own cars — quality, safety and cost under one roof.

02

UN

UN-Energy Special Award

A humanitarian honour that validates the mission to cool the earth.

03

500

Top 500 Chinese Enterprises

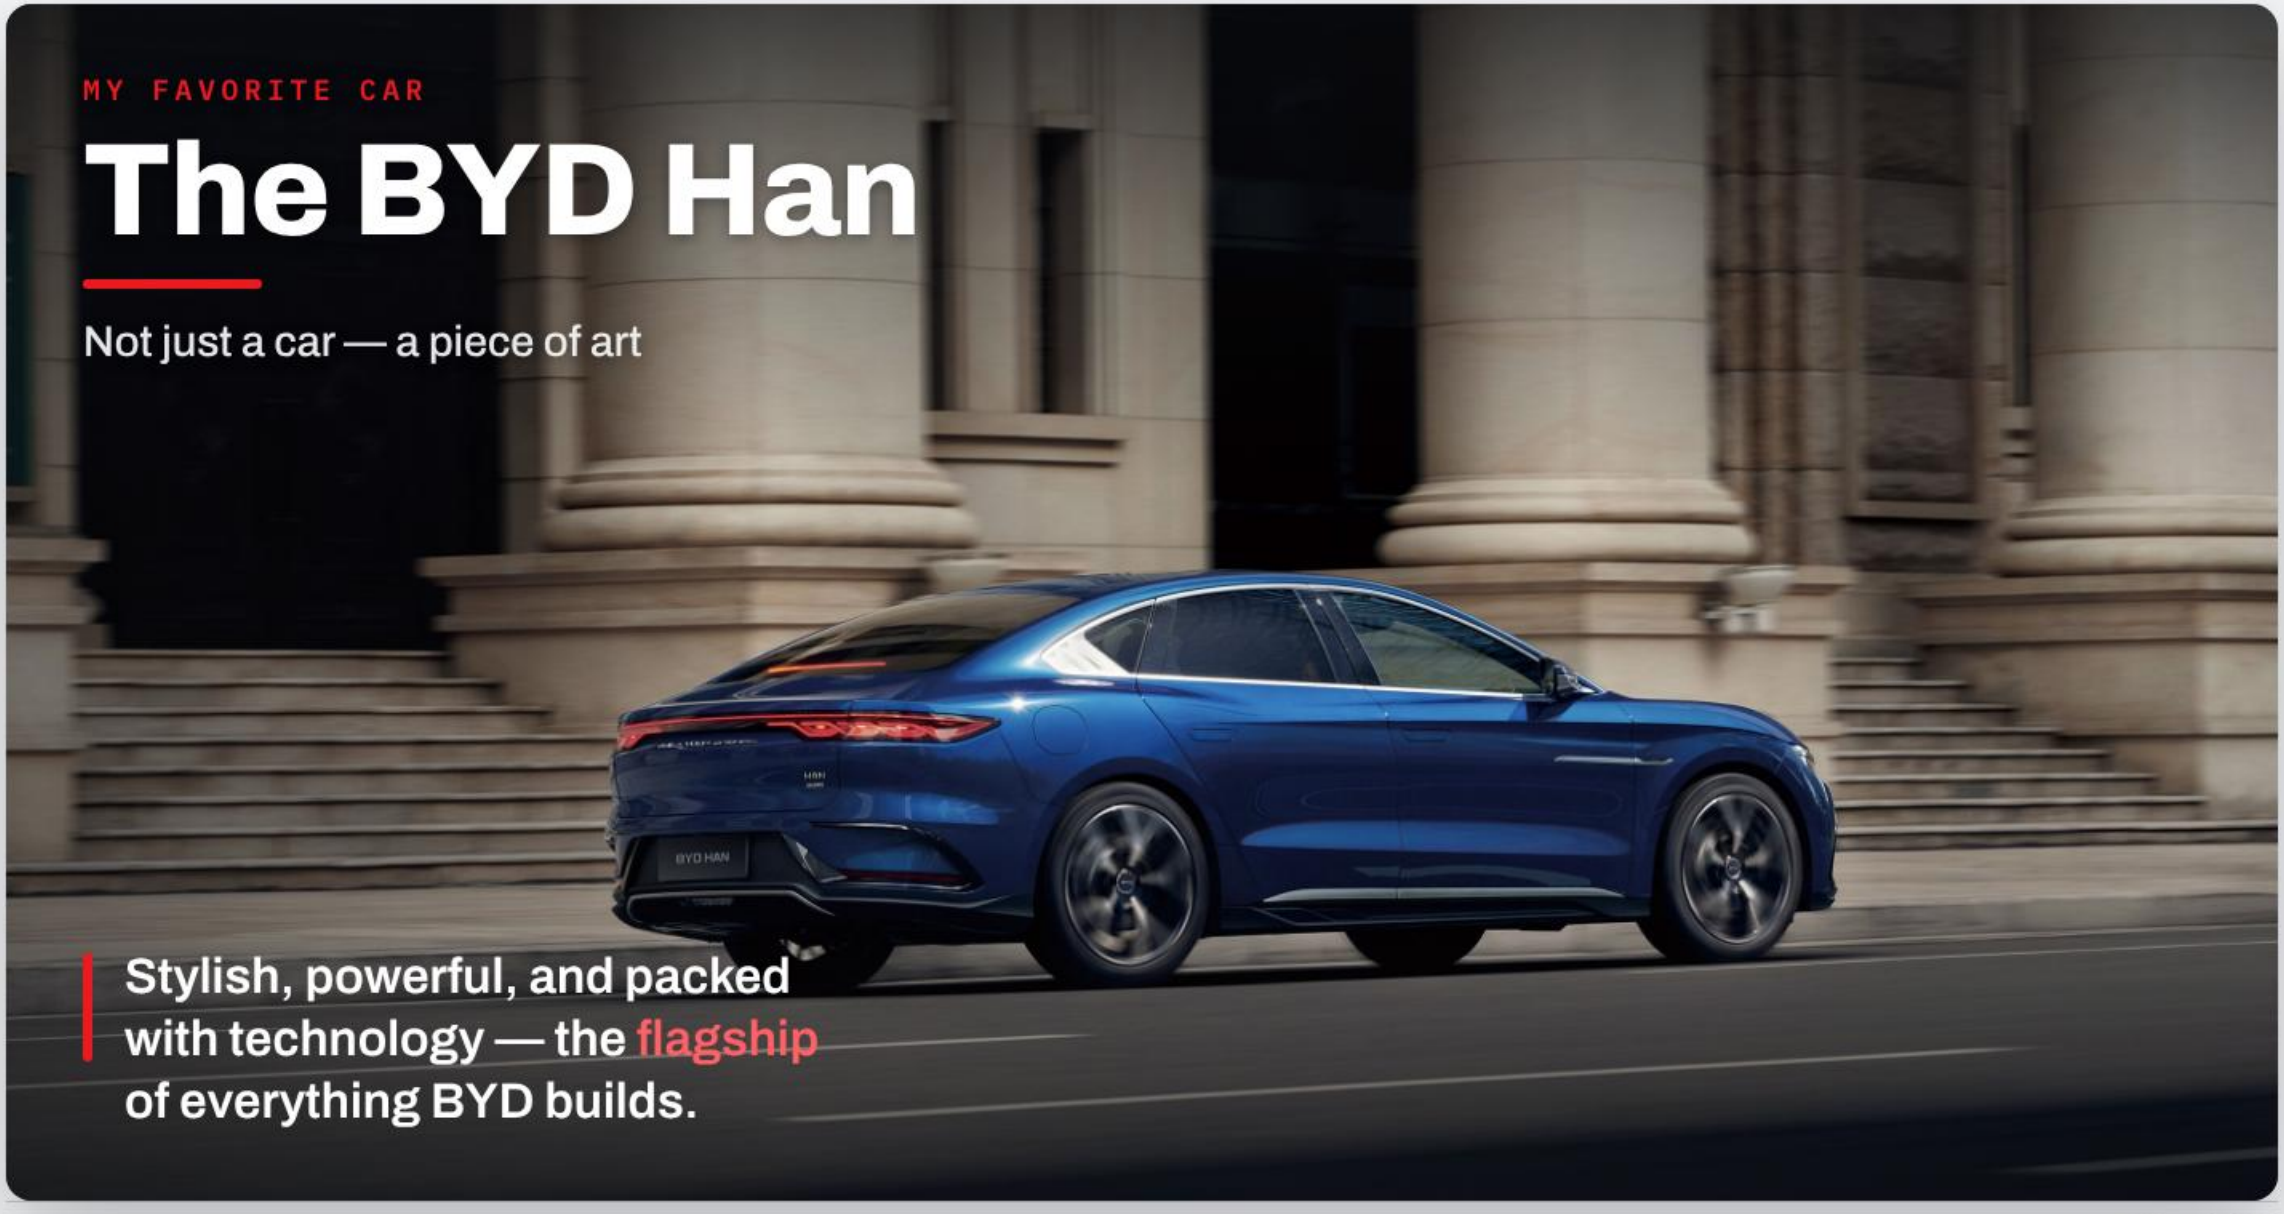

Economic strength, market influence and lasting stability.

Still rooted in batteries — now a **global leader**.

MY FAVORITE CAR

The BYD Han

Not just a car — a piece of art

Stylish, powerful, and packed with technology — the flagship of everything BYD builds.

DESIGN & HERITAGE

Tradition meets the future

Rear lights shaped like a Chinese knot

Full-width LED light bar

The “Chinese knot”

01 **Unity**

02 **Prosperity**

03 **Good luck**

A beautiful cultural touch on a cutting-edge EV — **modern and traditional at the same time.**

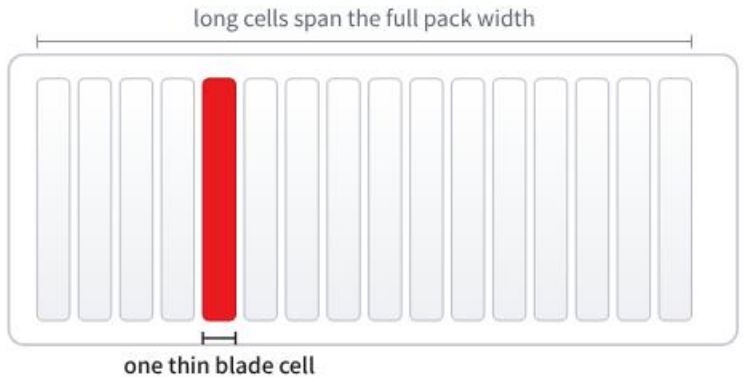

PERFORMANCE & TECHNOLOGY

Fast, smart, and safe

The revolutionary Blade Battery

THE BLADE BATTERY

Long, thin cells packed edge-to-edge

- Safe even under extreme conditions

PERFORMANCE

Breathtaking acceleration

Challenges luxury sports cars that cost twice as much — and shatters the “slow, boring golf cart” stereotype.

TECHNOLOGY

A smart mobile terminal

Packed with an intelligent interior and advanced safety features — not just a car.

Blade Battery — a safer battery shaped like thin blades.

WHY BYD MATTERS

Four pillars of significance

Technology • Economy • Pride • Planet

1

Technology leadership

Leads new-energy vehicle technology and sets the pace for the whole industry.

2

Economic growth

Thousands of jobs and a vast supply chain, exporting worldwide.

3

National pride

Chinese engineering and design now rank among the world's innovators.

4

Protecting the planet

Promoting EVs cuts carbon — the pledge to “cool the Earth by 1°C.”

THE MISSION

Cool the Earth by 1 degree

Every electric car means less carbon.

THE PROMISE

THE CHANGE WE DRIVE

Gasoline cars
add carbon to the sky

Every electric car
takes a little carbon away

Climate change is my generation’s crisis. The promise is simple: **a cleaner sky, a cooler earth** — one car at a time.

KEY TERMS

Words worth knowing

Three terms in plain English

TERM	IN PLAIN ENGLISH	WHY IT MATTERS
Blade Battery	BYD's battery made of long, thin blade-shaped cells — built to stay very safe, even in extreme conditions.	Safety you can trust
Carbon emissions	The gases from burning fuel like gasoline that trap heat and cause global warming.	The problem EVs solve
Rechargeable batteries	Batteries you can charge and use again and again — BYD's first product and the heart of an EV.	Where BYD began

CONCLUSION

From battery maker to green giant

We can have growth and a cooler earth

THE WHOLE STORY, IN THREE STEPS

1995

A battery maker in Shenzhen

2003

Steps into building cars

Today

China's largest car company & a world leader in green tech

THE TAKEAWAY

Growth and the planet were never a choice.
The Han and the Blade Battery prove **we can have both.**

BUILD YOUR DREAMS

> Not just a slogan — an invitation to dream of a cleaner sky and a cooler earth.

BUILD YOUR DREAMS

Thank You For Watching

Cool the Earth by 1 degree
